

Question	Answer
Does the track extend to the rail?	You could extend the track to the rail but this will block your pathway to the foredeck. We suggest mounting the track just in front of the mast and the Side console to be fitted close to your coach roof
Link to installation manual ST 22 boats up to 35 feet	http://www.seldenmast.com/files/1520862199/597-278-E.pdf
Link to installation manual ST 30 boats from 30-45 feet	http://www.seldenmast.com/files/1452845336/597-205-E.pdf
Is the track curved?	Yes the track is curved. We have standard radius curved track based on your "J" measurement. The track can also be angled for up the mast or over the deck sheet leads. See manual for more details
Is there a pin stop on the track for heaving too	No there is not a pin stop on the track. You could modify the track to accomplish this or lash the car to the side console
Are the required jib sheet blocks included?	They are ordered separately depending on over the deck or up the mast installation. See manual for details
I have a 105% jib will it need to be cut down	Yes most likely as the track is located just forward of the mast which accommodates a 100% jib. The clew height may also need to be adjusted. These measures are confirmed after the track is installed
